

Open **Photo Editor**.

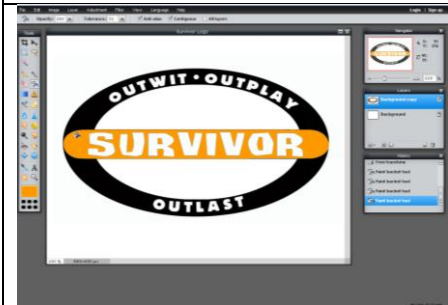

Click **Create New Image**, then set the dimensions to 800 x 600 and Name Your File!

Open: Your blank Survivor Logo Template.

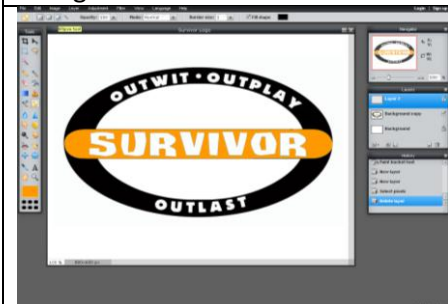

Once open, drag the Layer: **Background**, into your project. (You may have to resize the image once it's in. Select the **EDIT** tab, then free-transform)

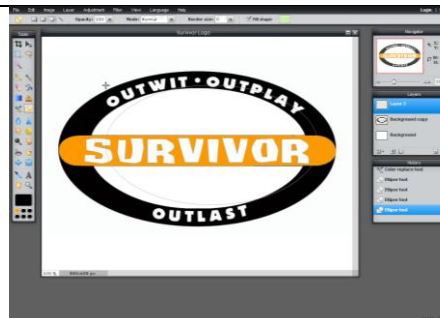

Use the **Paint Bucket Tool**, to change the logo background.

Create a **New Layer**.

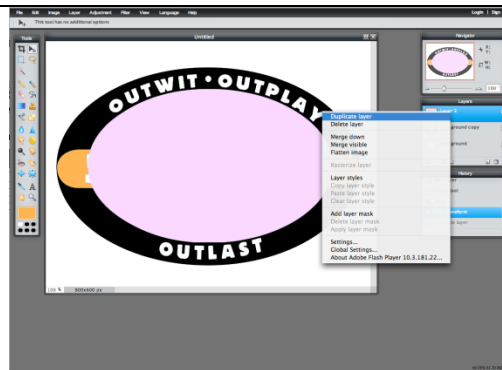

Select the **Eclipse Tool**: Found in '**Shapes**'.

Drag the **Eclipse Tool**, to form an oval around the inside of the border. You can use the '**Free Transform Tool**' to adjust the size.

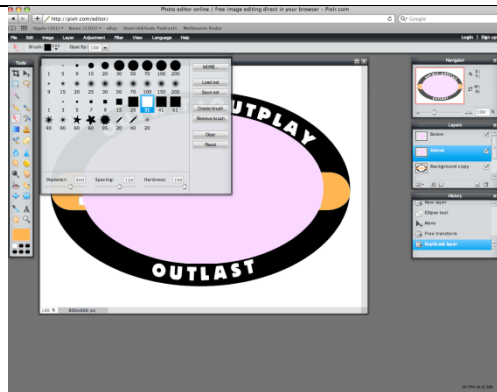

It should look like this. (The **Paint Bucket** can be used for any colour adjustment.)

Right click Layer 2, and duplicate it.

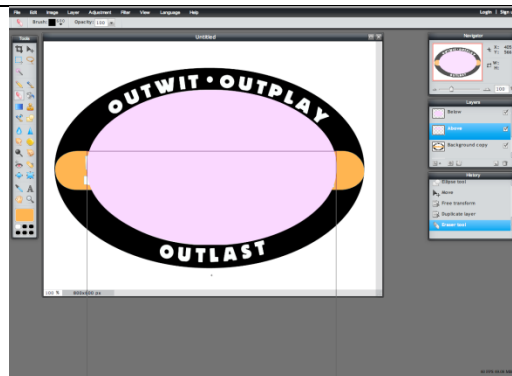

You will see, **Layer 2** and **Layer 2 copy**

Double click each layer, and rename them to, **Above** and **Below**

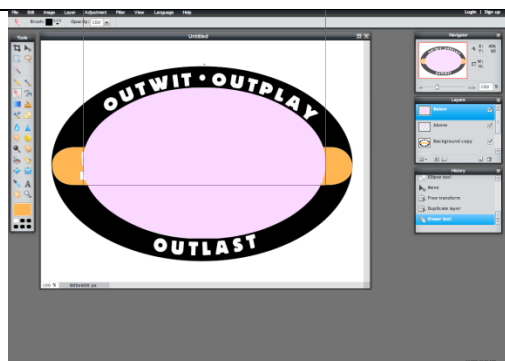

Select **Above** layer. Then the **Eraser** tool.

Click **Brush** as seen in the image above, choose a square brush, and slide the diameter to **600**

Position the giant **Eraser** as seen above, and click once.

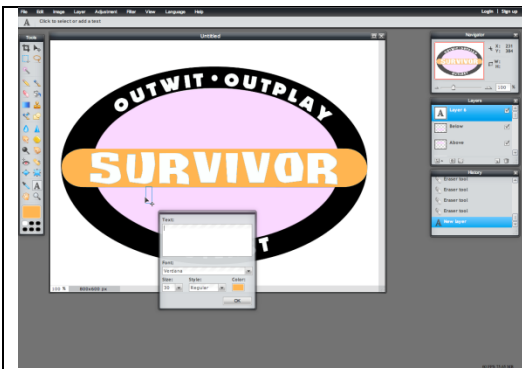

Now select you **Below** layer and repeat the process, but this time we are erasing the top half.

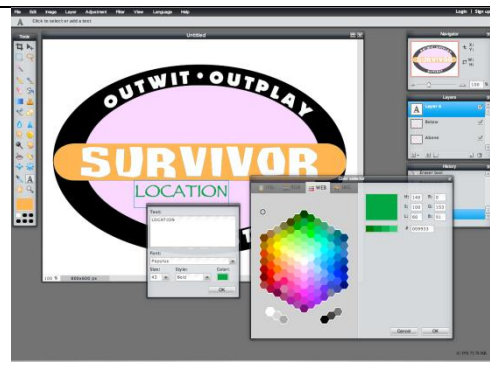

It should now look like this.

You can go back and re-size your eraser, if you need to fix up any little bits you may have missed.

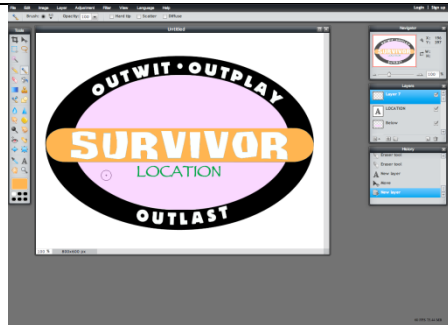

Select the **Text** tool. Simply click your mouse in the bottom half of the logo, and it will create a **Text Box** and its own layer.

Type your Location in the **Text Box** and adjust the **Font, Size, Style & Colour** to your liking.

You can use '**Free-Transform**' to re-size and position your text.

And there you have it.

You can now create new layers, and import and new images to throw onto your logo, or select the paint brush tool and draw your own designs!
